PROJECT INFORMATION

Purpose

The purpose of this request for proposals (RFP) is to provide interested consultant firms with sufficient information concerning the services desired by the County of San Luis Obispo. This information is intended to enable the firms to prepare and submit proposals to conduct mitigation monitoring and reporting for the construction phase for a project to replace the existing low water crossing with a bridge on Ferrasci Road over Santa Rosa Creek east of the community of Cambria in San Luis Obispo County (see Exhibit A – Ferrasci USGS Vicinity Map).

Project Description

The California Coastal Conservancy funded the design and permitting of this and four other fish passage projects in San Luis Obispo County through grant funds from their Resource Enhancement Program. Santa Rosa Creek was chosen for funding following a thorough analysis and ranking of fish passage barriers throughout the County. A coalition and task force were developed to prioritize and select barriers for replacement or improvement. The Ferrasci Road barrier was ranked as the number one priority for fish passage projects in the County.

The Department of Public Works will remove the existing low water crossing and install a new bridge on Ferrasci Road. The project is scheduled to begin summer 2011, and would proceed in eight general phases: 1) installing a temporary stream diversion using sandbags and flexible piping; 2) constructing a temporary stream crossing immediately downstream of the existing crossing; 3) removing the existing concrete culverted stream crossing; 4) constructing a single-lane, cast-in-place, post-tensioned box girder span bridge on concrete abutments; 5) placing ungrouted rock slope protection around the abutments; 6) grading the channel to a stable slope between the upper and lower limits of the project area; 7) installing large woody debris and boulder clusters as in-channel stabilization features; and 8) planting native vegetation along the creek banks. Prior to any ground disturbance, the creek would be diverted if live flow is present. Equipment staging areas will be located on the upper banks of the channel and in the turnout at the intersection of Ferrasci and Santa Rosa Creek Roads.

A Mitigated Negative Declaration was prepared for *The 2007 Fisheries Restoration Grant Program in Del Norte, Humboldt, Mendocino, Napa, San Luis Obispo, Santa Barbara, Santa Cruz, Siskiyou and Trinity Counties and Required Agreement Regarding Proposed Stream or Lake Alteration*. The Notice of Determination was published on May 21, 2007. A Biological Assessment was prepared by The Land Conservancy for the project in April of 2010. Permits/authorizations have been issued by the California Department of Fish and Game, the U.S. Army Corps of Engineers, the Regional Water Quality Control Board, the National Marine Fisheries Service, and the U.S. Fish and Wildlife Service. If your firm is interested in proposing, copies of these permits can be obtained by contacting the County representative Eric Wier via email at ewier@co.slo.ca.us.

Project Location

The project is located on the main stem of Santa Rosa Creek at Ferrasci Road, 200 feet south of the intersection of Ferrasci Road and Santa Rosa Creek Road, north of the community of Cambria in San Luis Obispo County. The site can be located on the USGS 7.5 minute series Cambria Quadrangle.

- Clean Water Act (33 USC 1251 et seq.) (emphasis on sections 401 and 404)
- California Endangered Species Act (Fish and Game Code ' 2050 et seq.)

Specific Requirements

A. Construction Monitoring

Prior to project start-up, the selected consultant shall conduct pre-construction surveys in coordination with County biologists for listed and sensitive species including the California red-legged frog, steelhead trout, southwestern pond turtle, two-striped garter snake, Coast Range newt, bats, and nesting birds. The biologists must be approved in writing by the U.S. Fish and Wildlife Service to survey for and handle California red-legged frogs at least 30 days prior to project commencement. red-legged frogs, steelhead trout, southwestern pond turtles, two-striped garter snakes, Coast Range newt, bats, nesting birds, and riparian habitats. The program shall explain the importance of minimizing disturbance and adhering to other disturbance minimizing measures.

The qualified biologist will monitor all vegetation clearing activities, dewatering, and construction activities within the creek channel. Continuous monitoring will be required. Consultants should bid assuming work will take place full time (40 hours/week) from June 15-October 31, 2011. Daily monitoring reports must be prepared and submitted to the County weekly.

The completion report must include a summary of daily activities, monitoring observations, problems incurred and actions taken, color photographs of the site before, during, and after construction, as-built plans, a description of major construction activities, and the condition of the site at the conclusion of the construction.
